

Geography

To ignite every child's curiosity about the diverse world, its people, and its environments. Through engaging inquiry, practical fieldwork, and rich geographical knowledge, we empower pupils to understand the connections between human and physical landscapes, fostering responsible global citizens who care for our planet's future.

Intent - we aim to...

inspire a lasting curiosity and fascination about the world and its people, fostering pride in our local area as well as developing curiosity about the wider world.

develop knowledge of diverse places, people and environments in the UK and abroad.

help children understand and explain the key physical and human processes that shape the world and how they are interconnected.

build essential geographical skills, including using maps, atlases, globes, digital mapping and fieldwork.

Encourage critical thinking by enabling children to ask questions, analyse information, draw conclusions and form opinions on environmental and social issues.

Implementation - How do we achieve our aims?

High
Quality
Teaching

Make enquiry the heart of the subject, link to real life, use a variety of tools.

Curriculum

Ensure curriculum is mapped so learning in each year builds on prior knowledge, moving from the local to the global, and focusing on developing key concepts and enquiry skills over time.
Integrate with other subjects.

CPD

Provide CPD for our staff to enable them to deliver the first two implementation boxes, as well as to incorporate fieldwork confidently.
